NOCE COLLECTION · TRAVERTINE

TRAVERTINE COLLECTION

TECHNICAL DATA & INSTALLATION GUIDELINES

Natural travertine quarried in Turkey, offered in honed, honed filled, multi-textured, splitface finishes, in Roman Pattern, 4" × 4", 6" × 6", 6" × 12", 6" × 24", with matching pavers, mosaics, moldings, decorative borders, ledger panels, pool copings. Every piece is unique; color, veining and texture vary by nature.

AT A GLANCE

- **Natural travertine** · quarried in Turkey
- **Honed, Honed Filled, Multi-Textured** · finishes
- **47 items** · tiles, pavers, mosaics
- **Sealing recommended** · before grouting and after
- **Natural variation** · blend boxes as you set

02 TECHNICAL CHARACTERISTICS SPECIFICATIONS

SPECIFICATION	VALUE
Material	Natural travertine
Country of origin	Turkey
Finishes	Honed, Honed Filled, Multi-Textured, Splitface, Thick-Rolled, Tumbled
Thickness	2", 1/2", 3/4", 3/8", 5/8", 1 1/4"

- Natural stone is not tested to porcelain standards such as PEI or ASTM C373, and values vary by block. Color, veining, fossils and pitting are natural features, not defects. Ask us for current test data on a specific item.

03 APPLICATIONS
WHERE TO USE IT

PRODUCT	RES. FLOORS	COM. FLOORS	WALLS	SHOWER FLOORS	SHOWER WALLS
Field tiles	Yes	Yes	Yes	Yes	Yes
Pavers (exterior)	Yes	Yes	No	Yes	Yes
Mosaics	Yes	Yes	Yes	Yes	Yes
Moldings & trims	No	No	Yes	No	Yes
Decorative borders	Yes	No	Yes	No	Yes
Ledger panels	No	No	Yes	No	Yes
Pool copings	Yes	Yes	No	Yes	Yes

Ratings follow each item on tilepoint.com; check the product page for the exact item. Pavers and copings are for exterior use; polished finishes are best kept off wet floors.

04 ON THE JOB
INSTALLATION

1. **Prepare the surface.** Substrate must be sound, flat and rigid per ANSI A108 and the TCNA Handbook. In showers and exterior areas, install a waterproofing membrane (ANSI A118.10) first.
2. **Blend and inspect.** Natural stone varies from piece to piece by nature. Open several boxes, mix pieces and set aside any you do not like before you set.
3. **Use a white, polymer-modified thin-set.** For light marbles and limestones a white mortar (ANSI A118.4 / A118.15) prevents shadowing. Back-butter for full contact.
4. **Seal before grouting.** Apply a penetrating stone sealer to the face before grouting, especially on honed, tumbled and textured finishes.
5. **Grout.** Use an unsanded grout for joints under 1/8", sanded for wider joints; test on a spare piece first. Wipe residue promptly.
6. **Seal again and add movement joints.** Apply a final coat of sealer after the grout cures. Place soft joints per TCNA EJ171.

Wet saw

Cut with a wet saw and a diamond blade made for stone. Never cut dry: it throws crystalline silica dust. Wear eye, hand and breathing protection.

Seal it

A penetrating sealer helps protect the stone from staining. Test it on a spare piece to see how it changes the color.

05 AFTER THE JOB
CARE AND MAINTENANCE

EVERYDAY

Clean with warm water and a pH-neutral stone cleaner. Wipe up spills quickly, especially acids like wine, citrus and vinegar. Reseal periodically as the sealer maker recommends.

NEVER USE

Acidic or alkaline cleaners, vinegar, bleach or ammonia, abrasive powders, steel wool or scouring pads. They etch or dull the stone.

Values are typical of normal production and given in good faith. Shade and pattern vary between production runs and may differ from printed or on-screen colors; choose from actual pieces. Installation must follow the setting material manufacturer's instructions, ANSI A108/A118, ANSI A137.1, the TCNA Handbook and local building codes.
